

Aether

Projects worth crossing borders for.

A project-capital workspace and funding router for Southeast Asian work with a story, a scope, and a reason to move capital.

MIXED INVESTOR ROOM

DEVNET PRODUCT

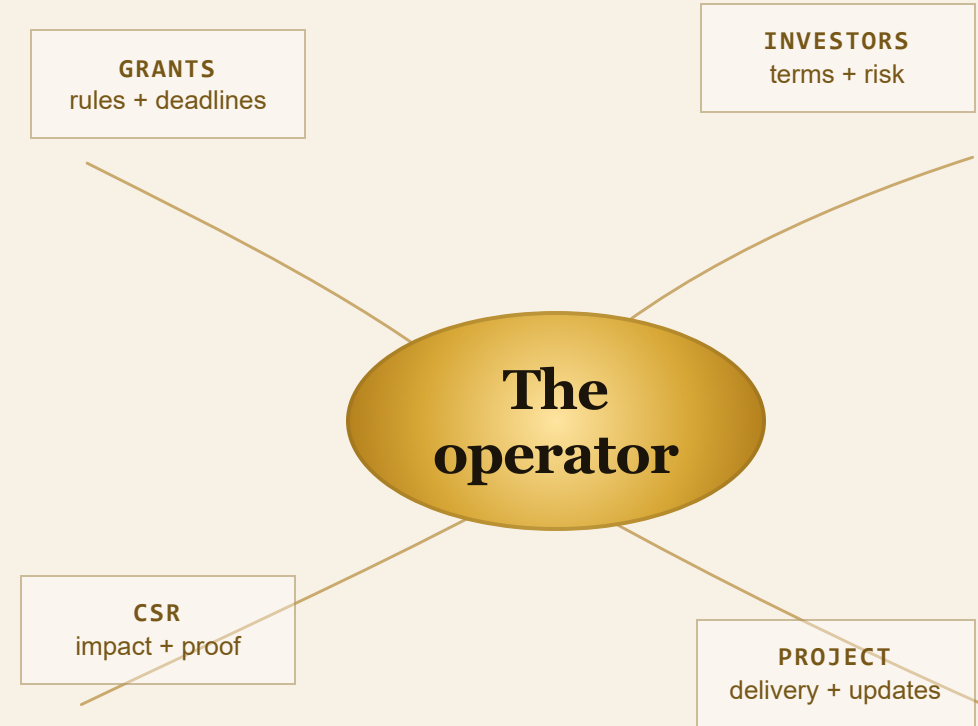

Good projects are forced to translate themselves three ways.

One project becomes an investor memo, a grant application, and a CSR report. The work stays the same; the language, evidence, timing, and trust requirements keep changing.

FRAGMENTED CAPITAL

SCATTERED EVIDENCE

THE AETHER PROJECT ROOM

Make the work legible before the capital moves.

Aether keeps operator identity, place, capital model, evidence, and progress in one brief before a funding conversation begins.

01

Frame

Define the operator, place, scope, and need.

02

Match

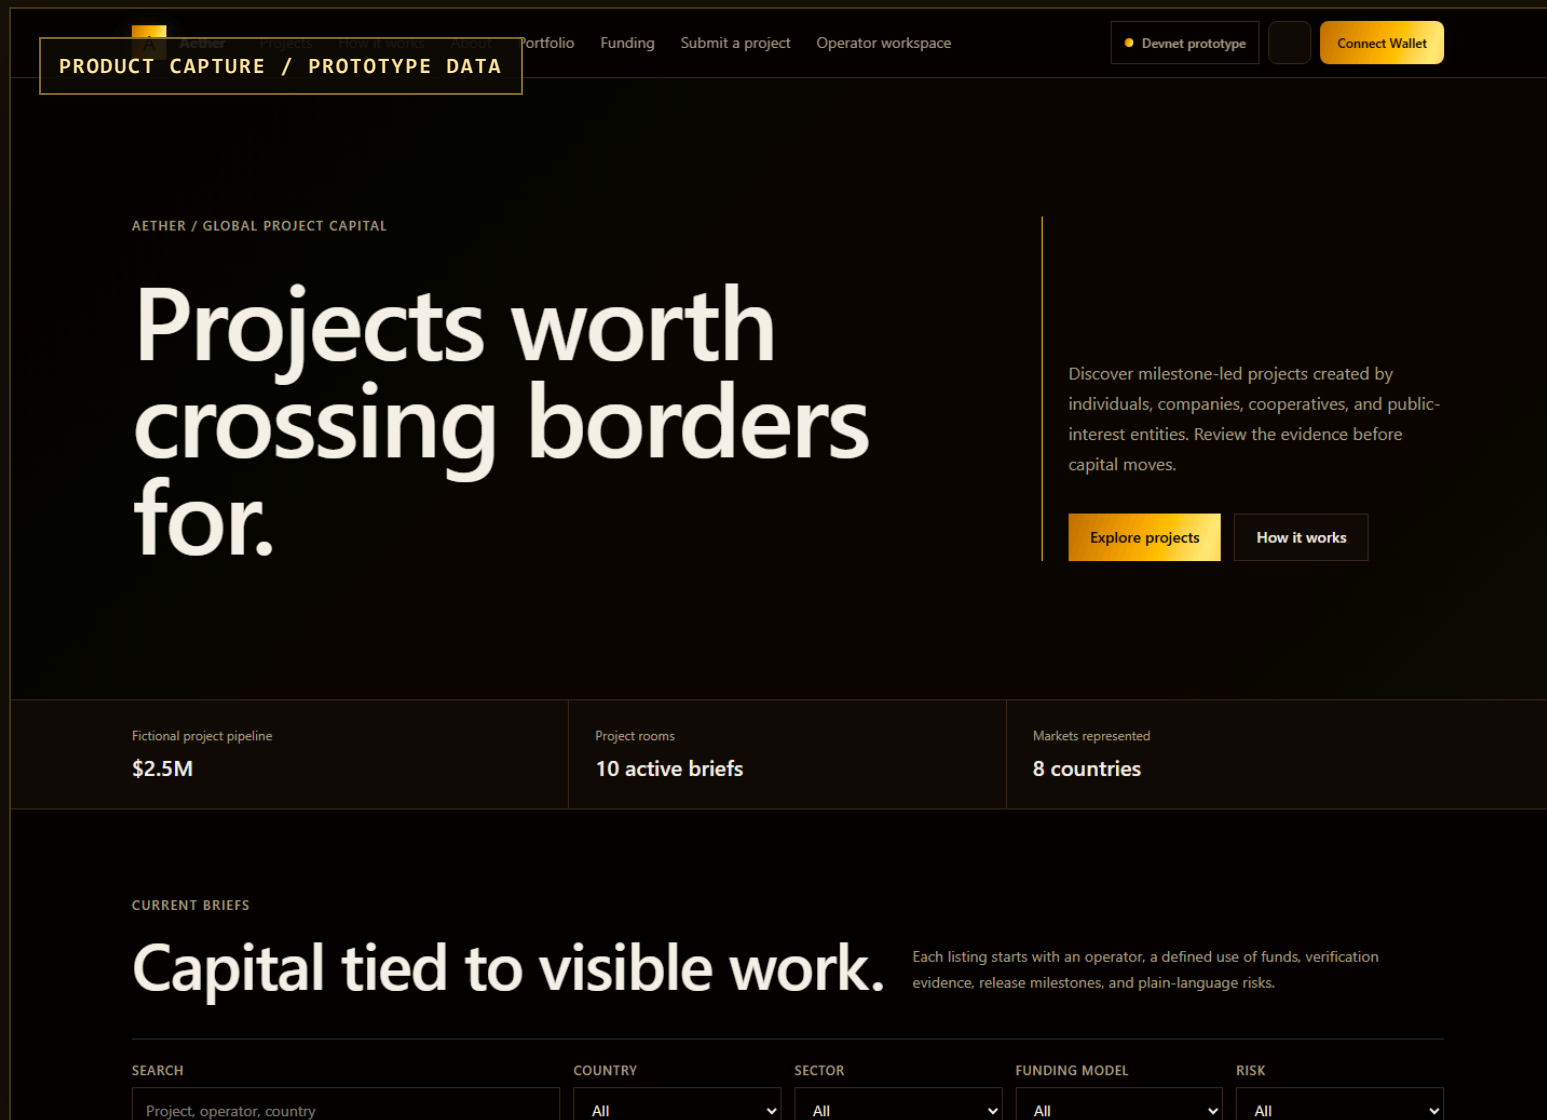

Route to the capital lane that fits.

03

Track

Keep milestones and updates attached.

THE WEDGE

A catalog of project rooms, not a token list.

10

PROTOTYPE ROOMS

8

REPRESENTED MARKETS

Demo catalog counts; no user traction is implied.

THE DECISION SURFACE

A project room holds the whole case.

01

Terms

Target, funding model, risk grade, impact.

02

Evidence

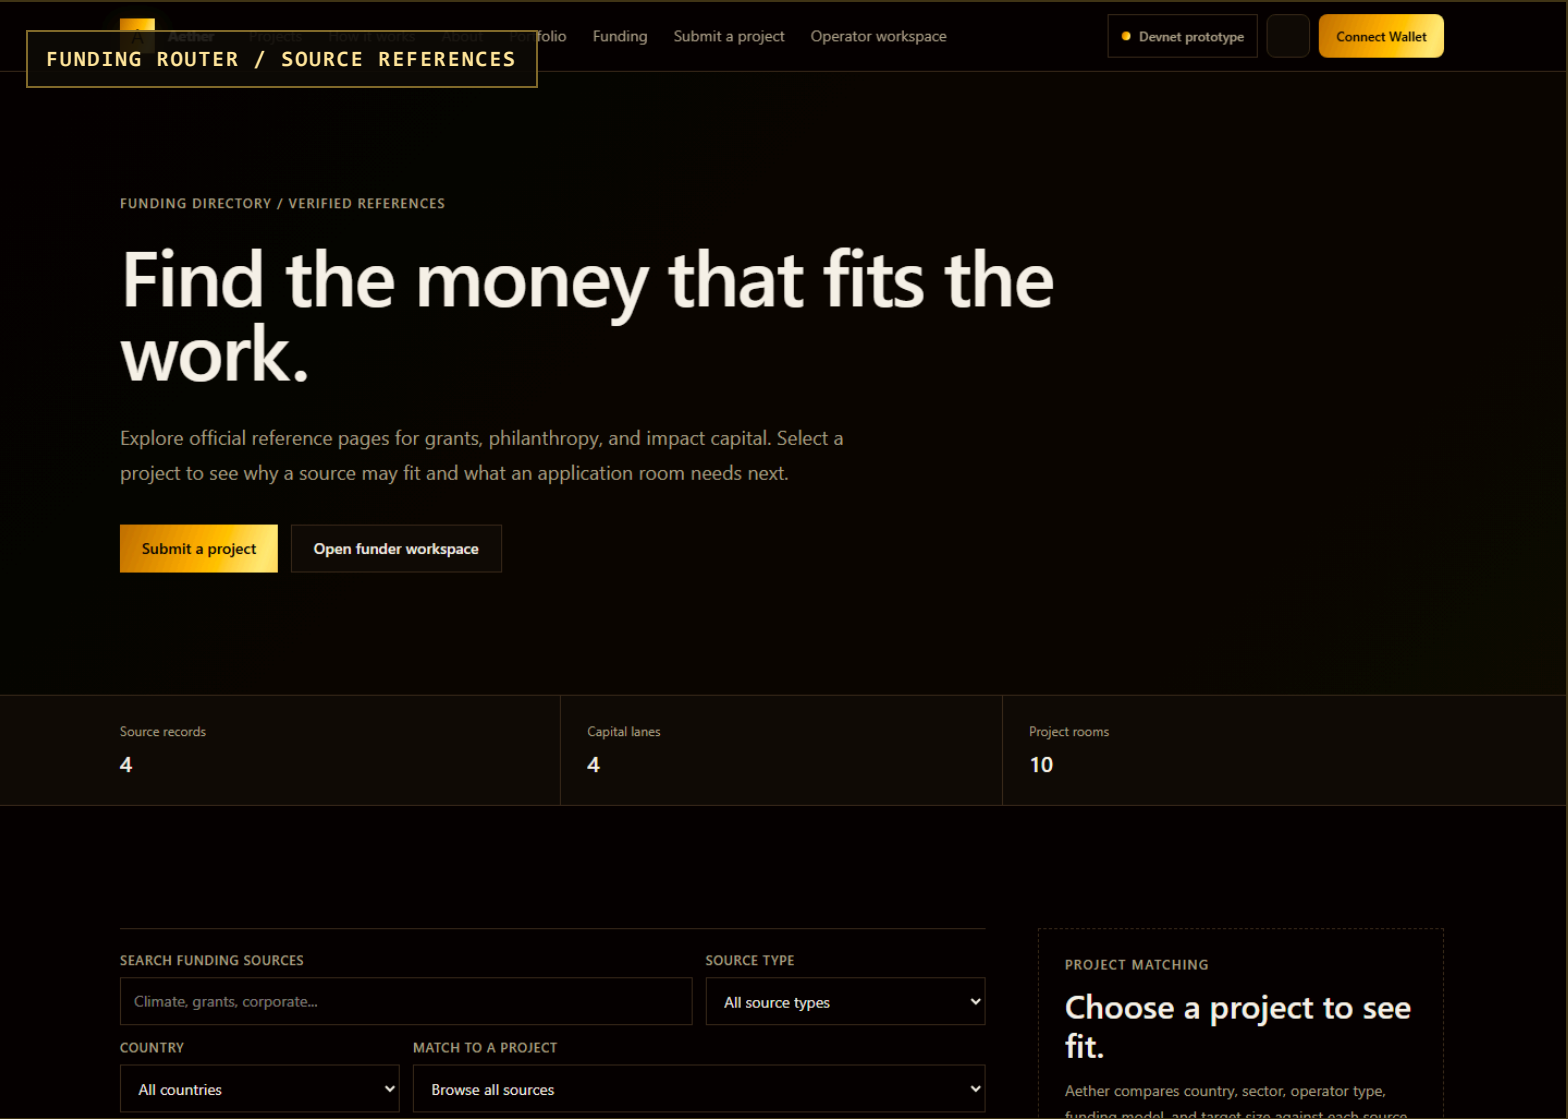

Milestones, updates, use of funds.

03

Action

Save, share, or test a devnet deposit.

DEVNET TEST-TOKEN FLOW; NO REAL FUNDS.

FUNDING ROUTER

Route the project to the capital lane that fits.

Investment

Defined financial rights for eligible capital.

Grants

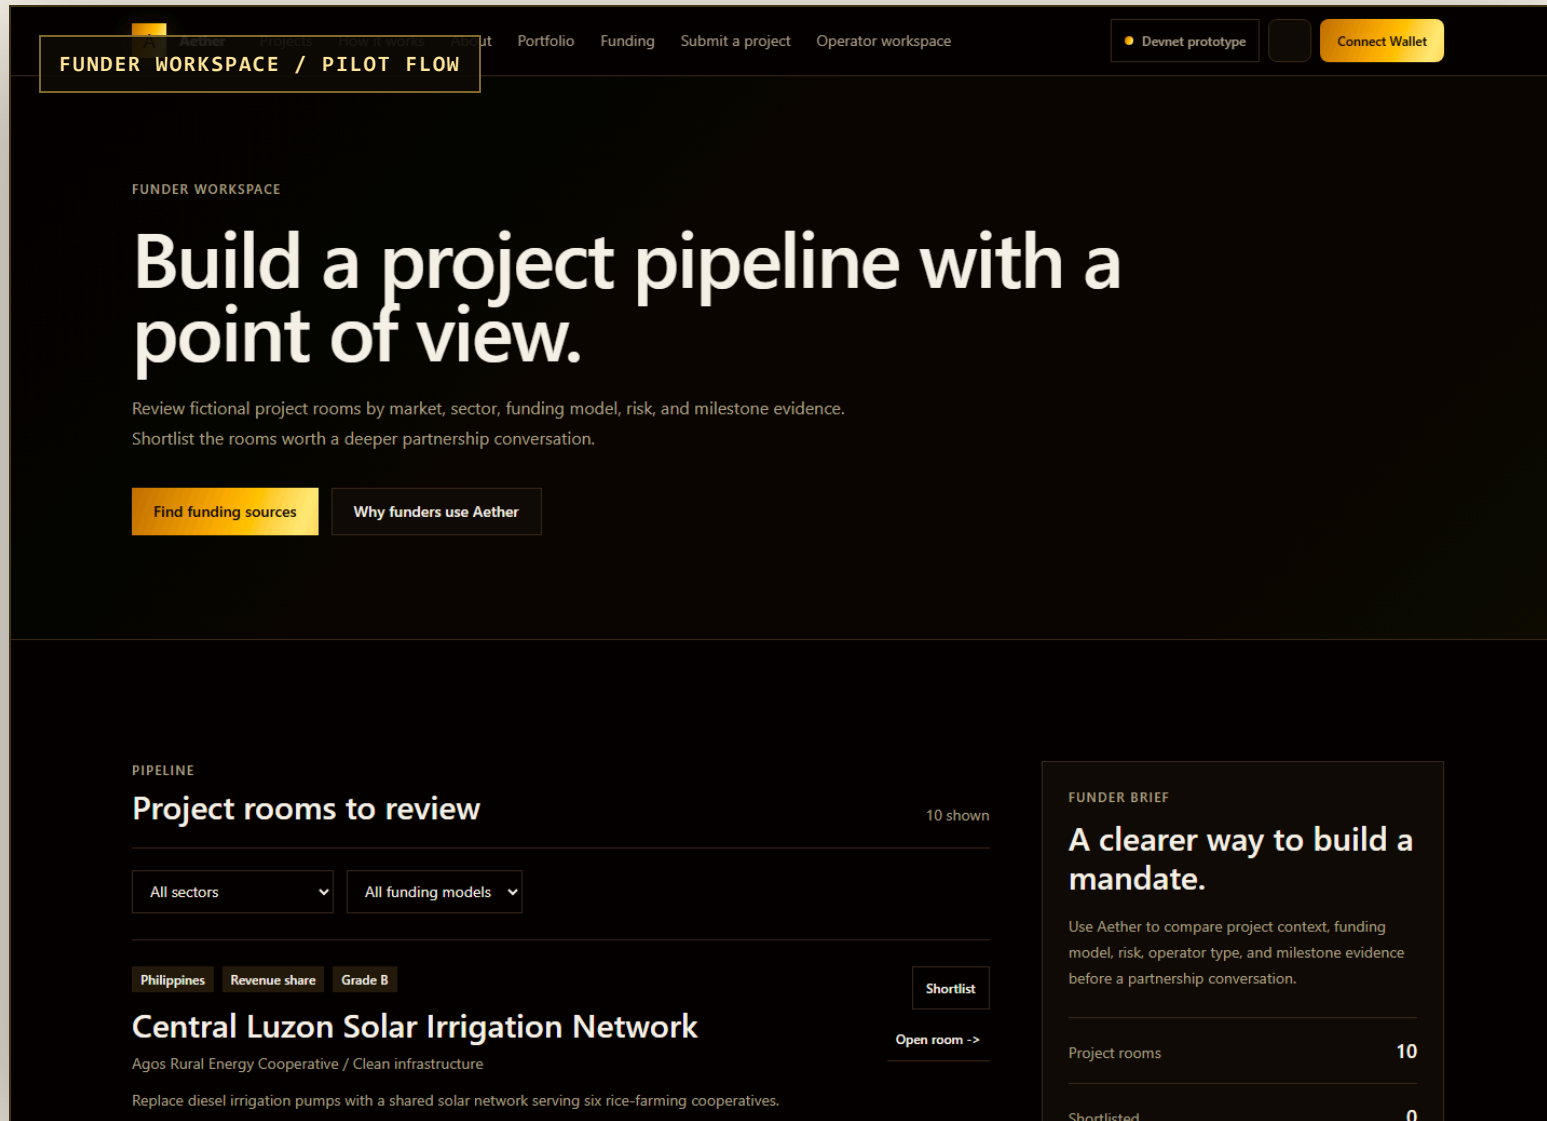

Non-dilutive capital for public benefit.

CSR

Corporate budgets with reporting needs.

Blended

Multiple layers for one project.

THE BUYER SIDE

Give institutional capital a pipeline it can inspect.

Corporations, foundations, impact funds, and development partners can shortlist project rooms before a partnership conversation.

PILOT WORKFLOW

Shortlist **projects**

Compare **mandates**

Partner **locally**

Use the chain for the movement record, not for the whole product.

[View on Solana Explorer](#) / [devnet](#)

Two separate smoke paths; values are not a combined balance.

Devnet only. Upgradeable. Unaudited. Not mainnet.

Start with services. Earn the right to handle capital.

Origination

Project-side fee when a verified match closes.

Administration

Milestone and reporting infrastructure.

Funder access

Corporate and institutional subscriptions.

Capital later

Only with regulated partners.

WHAT WE NEED NOW

Find the first corridor worth owning.

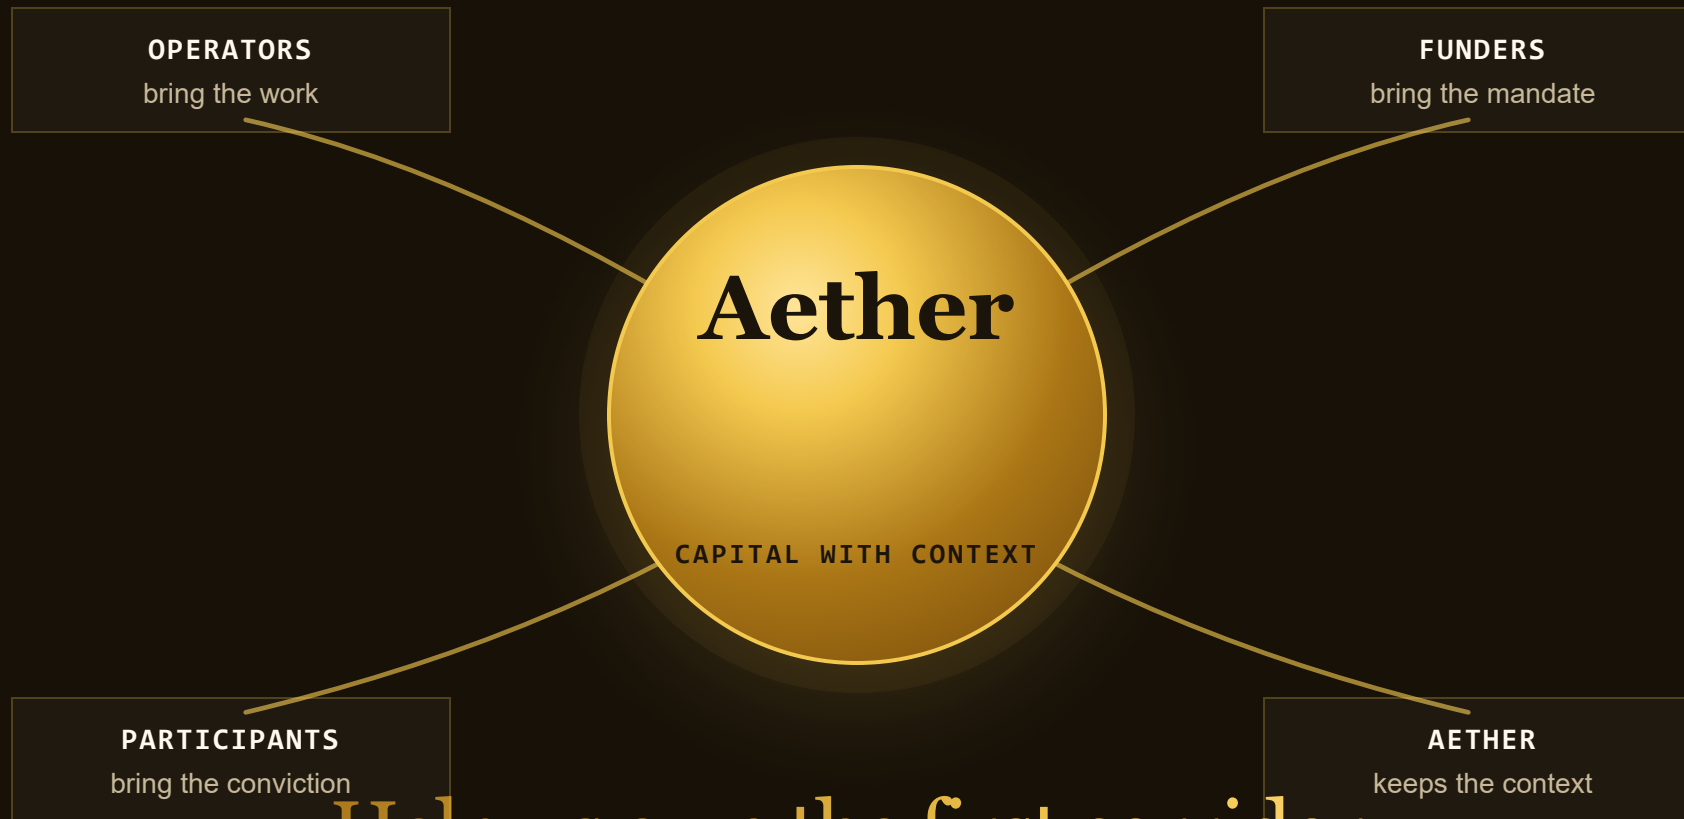

Project operators 5

Funder partners 3

Initial corridor 1

First capital lane Grant / CSR

Targets for the pilot, not achieved traction.

Help us own the first corridor.

Five operators. Three funder partners. One capital lane. Aether keeps the context attached from the first brief to the first proof.
